

The DESKO Corporate Payment System changes your till or your PC-workplace into a complete solution for payments, which offers you more than conventional terminals. Debit card payments as well as credit card payments can be authorized by DESKO CPS very fast. The process takes less than 3 seconds! Therefore, DESKO CPS is qualified for timecritical applications in gastronomy, hotel business and retail. Test DESKO CPS and be convinced of the advantages.

Your Advantages

- Extremely fast processing of payments - in the average less than 3 seconds
- Easily connected to till programmes and PC workplaces; existing hardware, like bon printers are utilized
- ON-line authorization of debit and credit cards; optional OFF-line mode ensures a high disposability
- No maintenance contract for soft- or hardware, low transaction costs
- Single or multi user and network capable

Types of Payment

Debit Notes ON-Line OLV

Instant processing of an ON-line debit note; daily accounting on your bank deposit. Optional software controlled examination of black lists. The assumption of claim failures can be arranged.

Credit Card Payments

For the credit card payments in the American Express, Visa, Mastercard, Diners and JCB format, DESKO CPS offers the ideal processing platform. Easy integration, fast authorization and low transaction costs simplify your credit card accessibility.

Security

DESKO takes pride in its CPS, which is known for being secure and reliable. Hence your requirements, concerning permanent availability, data protection and data backups are warranted and the possibilities of other providers are excelled by far.

Network Connection

DESKO CPS works with IP interfaces without a "direct" line. Your till or PC merely needs to contact the DESKO computer center. You can decide independently about the appropriated network connection: Whether as analogue or digital dialing line, Datex P - connection, as DSL wideband connection or even as mobile connection via GPRS - we use your already existing infrastructure.

Single or Multi User

Furthermore DESKO CPS communicates internal via IP interface - this means, that your connection can be used without any changes at one or at up to 32.000 working places. No component modifications are necessary.
